

NAGARJUNA FERTILIZERS AND CHEMICALS LIMITED

RESPONSIBLE CARE IMPLEMENTATION

Nagarjuna Fertilizers and Chemicals Limited (NFCL), is in the process of implementing “Responsible Care (RC)” as a voluntary initiative to improve the company’s performance in Safety, Health, Environment and Security.

The purpose of this initiative is to ensure no accident, no injuries, no illnesses and no harm to the environment.

Indian Chemical Council (ICC) is a premier institute in India, who are encouraging Chemical industries to undertake Responsible Care initiatives.

Based on the “Guiding Principles” of ICC, Mumbai the company has adopted various internal procedures on the following seven codes of practices:

Seven Code of “Responsible Care (RC)” are

- 1. Process Safety Code**
- 2. Employee Health & Safety Code**
- 3. Pollution Prevention Code**
- 4. Community Awareness & Emergency Response (CAER) Code**
- 5. Distribution Code**
- 6. Product stewardship code**
- 7. Security Code**

The company is gearing-up for the RC 14001: 2008 Certification and intends to undergo Audit for the certification before end of financial year 2011-2012.

Meanwhile the company has voluntarily undergone “RC Logo audit” by M/s Indian Chemical Council, to assess the extent of implementation of RC requirements in various codes of practices as per the guiding principles of ICC.

The company was granted use of “**RC Logo**” by ICC pursuant to an audit of the company.
